

Dan White
Work History

USAF, 4 years, RCA Down Range tracking, Trinidad WI, 3 years, Lockheed NASA Clear Lake LEM simulator. Rice University, 10 years, Gulf Oil RV Hollis Hedberg seismic survey, 4 years, Process Control with various companies for 15 years. After that I worked for myself raising horse hay and operating a two-way radio business. As I'm now retired I now just work on the ranch raising Akaushi cattle and hay.

While at Rice I worked for Dr. Paul Cloutier and Delbert Oehme (my direct "boss") designing the rocket payload hardware and what ever Del assigned me to do with electronics. Del got me back into flying so I completed my private, commercial and instructor ratings (Airplane and Instruments). I had a few students from Rice. Martha Fenner, Private certificate , Dr. Alex Dessler, Instrument rating. Can you imagine Dr. Bob Speiger and me in my '59 Cessna 150! Also, the famous Dan Boone and I traded services. He wanted to solo and I needed two bikes.

I think Rice was the pinnacle of my carrier. I enjoyed all of the time and value the things I learned.
